

[DATASHEET](#)

Integration *Matrix*

Supported connectors and reasoning coverage across the identity platforms enterprises already run.

OVERVIEW

Built to run with your stack

KeyForgeAI consumes identity, entitlement, and event signals from the platforms you already operate, reasons over them continuously, and returns decisions and evidence to the same systems. Integration depth by platform is summarized below: ● **Full** coverage, or **Partial** (on the current roadmap).

GOVERNANCE PLATFORMS

IGA integration coverage

Capability	SailPoint	Saviynt	SAP IAG	MS Entra
Identity & entitlement sync	● Full	● Full	● Full	● Full
Request-time reasoning	● Full	● Full	● Full	● Full
Approval routing decisions	● Full	● Full	● Full	● Full
Certification enrichment	● Full	● Full	Partial	● Full
SoD posture exchange	● Full	● Full	● Full	Partial
Provisioning dependency signals	● Full	Partial	Partial	● Full

IDENTITY & ACCESS SOURCES

Source-layer coverage

Capability	Okta	Entra ID	CyberArk	Active Directory
Identity inventory	● Full	● Full	● Full	● Full
Entitlement model ingestion	● Full	● Full	● Full	● Full
Non-human identity discovery	● Full	● Full	● Full	● Full
Secret / credential lineage	Partial	Partial	● Full	Partial
Context-change event streams	● Full	● Full	● Full	Partial

EXPERIENCE & AGENTIC SURFACES

Where decisions surface

Surface	Coverage
ServiceNow	Request intake, approval tasks, decision evidence write-back.
Slack	Approvals, notifications, conversational decision explanations.
Custom portals / API	Full decision API: evaluate, explain, evidence.
AI agents & MCP servers	Agent registration, scope validation, request-time reasoning for agentic access.

Don't see your platform? Integrations ship regularly — contact us at www.keyforge.ai/contact for the current roadmap or to discuss a specific connector.
